

## Supply Chain Coach

If you are currently utilizing transportation software, we can help ensure that you are maximizing the value. If you have come to the point where it is time to implement new software, we can walk your team through that process.

The key services of Supply Chain Coach include:

- **TMS & WMS Technology Coaching and Sourcing**
- **Recruiting of Supply Chain Resources**
- **Design & Implementation Of Logistics Solutions**
- **Continuous Process Improvement Training**
- **Warehousing/WMS/ Inventory Control**

There are times when you want to manage the process internally but your team needs the tools and coaching to elevate their performance.

With Supply Chain Coach, our team of professionals guides your staff through a 6-step process that starts with pulling and analyzing data and ends with implementation and continuous improvement. The result is training your staff to manage the transportation process while building competency within your organization.

With this approach, there is also a focus on increasing customer satisfaction that results from a more efficient supply chain.
